We Are Firm Believers
in The Transformative forces Of Design

About the designer.

Like his ancestors of the Italian Renaissance, Davide Tonizzo creates designs by combining art with engineering knowledge. Davide began his career in Italy designing cars for companies such as Alfa Romeo, Ferrari, Fiat, Lancia and Mercedes Benz. During this time, he also developed a true passion for furniture design and worked on numerous projects for Italian manufacturers. While technical skill and engineering know-how form the foundations of his works, it is his inspired story-telling approach that forms emotional connections between his products and the people who enjoy them.

Davide founded his professional design business in 1993 and has worked in Canada, Italy, USA, Denmark, Spain, Mexico and China and has created products in different industries such as automotive, bathwares, ceramics, soft-goods, green technology and of course, furniture. In these 30 plus years he has received 25 design awards and has several patents. Davide is a six-time winner of the prestigious Good Design Award. His work has appeared in the world's prominent design publications.

SLIDE

ITEM#:FY-830A / ITEM#:FY-830B

A new furniture concept inspired by a child's favourite playground toy.

Its three wide panels create a sense of flow. Creative personalization through a multi-piece design and a vibrant colour palette. The airy, open backrest makes draining easy for outdoor use.

Knock down design for efficient shipping and assembly.

SLIDE

Like a slide, this chair is great for outdoor use.

Sliding down a playground slide is a continuous, fluid movement. The design of this chair is dominated by the three wide slats that run from top to front creating the impression of one non-stop movement.

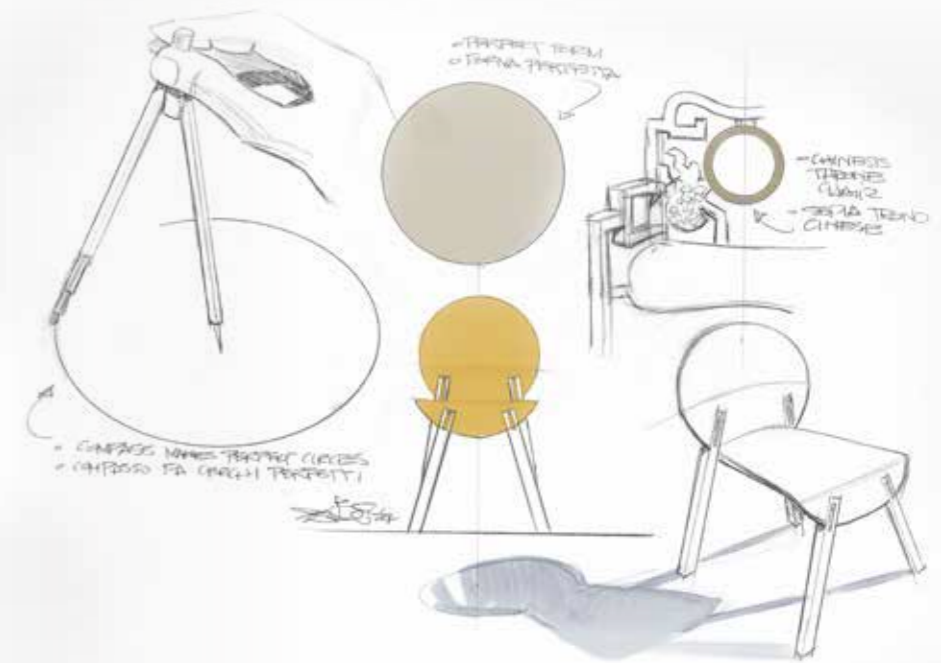

COMPASSO

ITEM#:FY-840

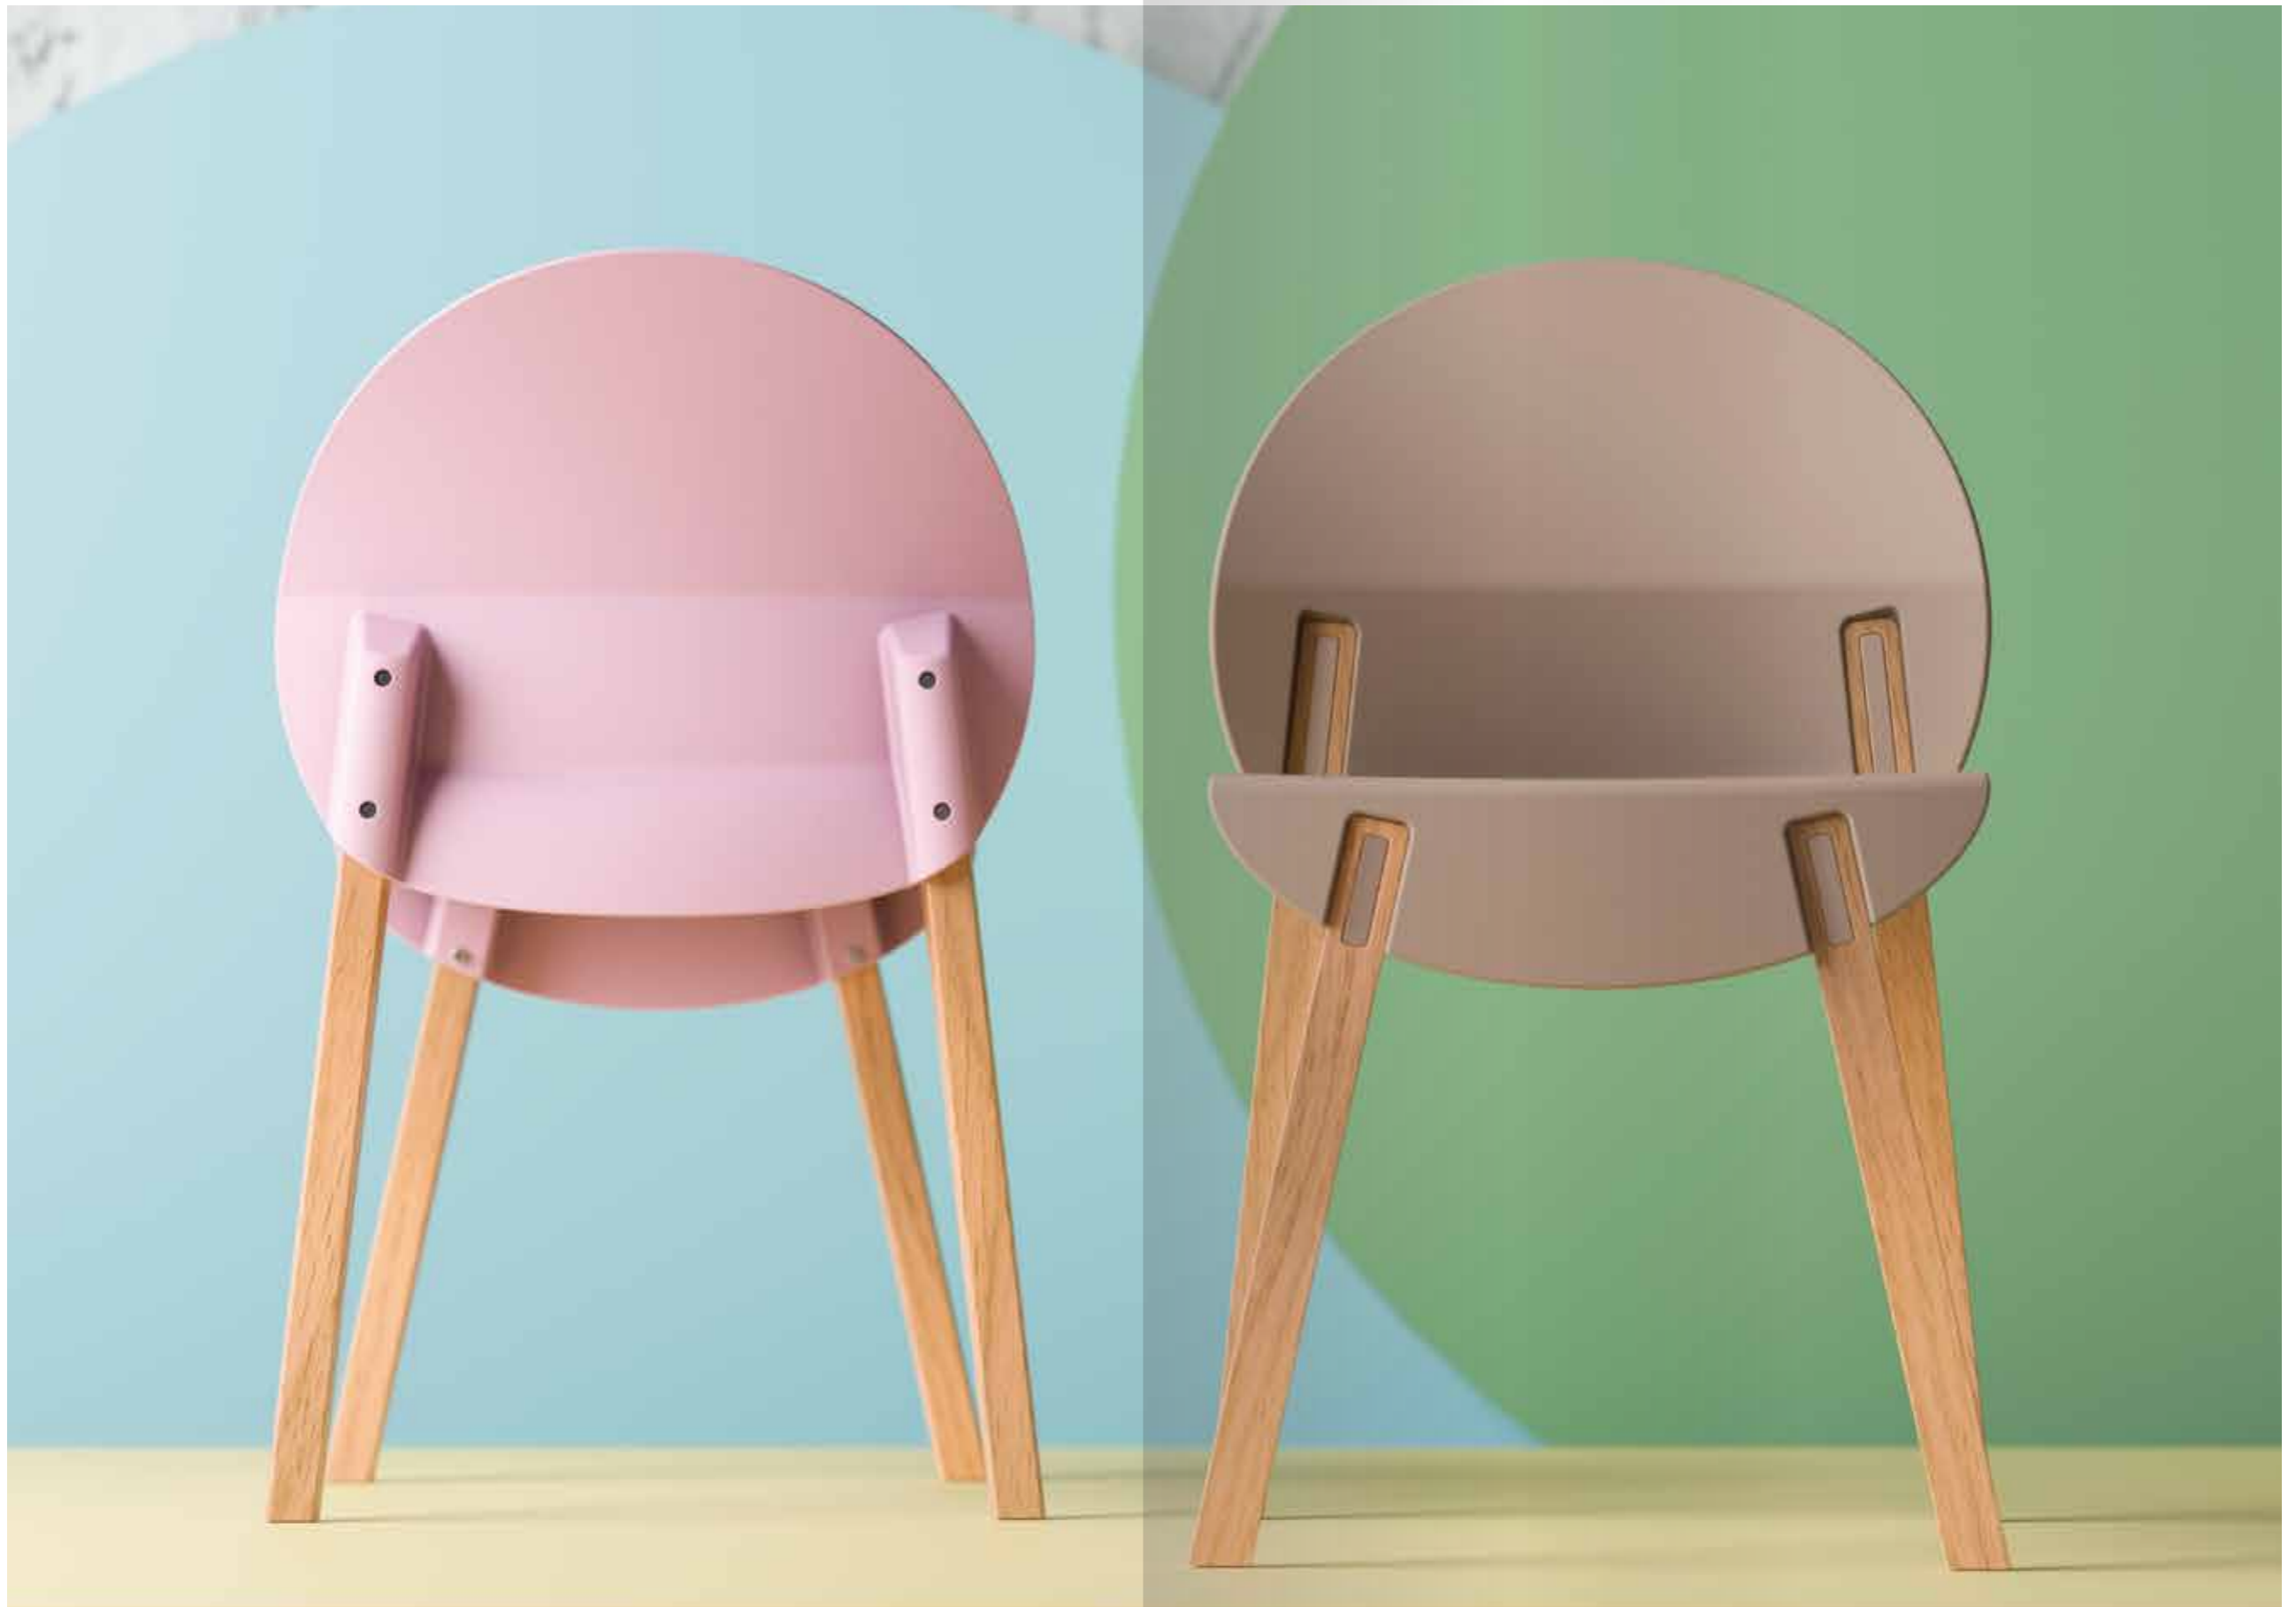

The circle, a simple geometric form, has long embodied harmony and elegance in design.

Compasso uses a sophisticated mix of modern plastic and classic wood. Its angled legs resemble compass arms which evoke a circle's creation. This design beautifully bridges the ancient world with our modern age.

BEGONIA

ITEM#:FY-850

Begonia is inspired by gardens. Its soft forms are inspired by flowers.

The large rounded backrest is shaped like a begonia petal. The circular seat and gently curving legs add to the chair's organic character. The separate seat and back make for easy draining. This is an ideal furniture piece for outdoors, especially gardens.

BEGONIA

TARTAN

ITEM#:FY-860

The Tartan chair is inspired by the multi-coloured, checkered textiles of Scotland. By "deconstructing" the shell into vertical and horizontal elements this chair creates a two tone design. The components can be specified in different colors to create unique, personalized furniture statements. The simple, metal frame makes it easy to stack. Tartan's open design is suitable for outdoor use and indoor minimalist style.
