HIGH-LEVEL DECISIONS-MAKING

STONE

STONE

STONE

STONE

Stone is the implied meaning of cognition to the final stage of the world in life. In the "Stone" series, traditional solid wood and special materials such as high-quality leather, marble and brass are combined to create a product line with a new oriental design concept.

STONE

Deal German series inherits the usual German style of high-end administrative products with clean and cool appearance as well as exquisite wood grain, revealing deep strength. Besides, the special desktop power module storage system endows the whole series with more artistic and aesthetic visual embodiment.

ACRON

HIGH-LEVEL DECISIONS-MAKING

The ACRON series is the company's featured product as a tribute to execution. The new all-aluminum alloy table legs represent a perfect combination of aesthetics and mechanics and continue the Nordic design style of simplicity in shape. The bevel edge design of the tabletop is also extremely delicate, fully bringing out the features of the wood and its texture.

ACRON

ACRON

ACRON

ACRON

HARRY

The metal geometric desk foot full of visual impact reflects a sense of power style. The combination of stainless steel feet and solid wood reveals the characteristics of fortitude, which is Harry. Simplicity is taken as the principle, and the clarity and tranquility are the form. The exquisite craftsmanship is shown in the veneer feature, seamlessly wrapped around the edge of the desktop.

HARRY

HIGH-LEVEL DECISIONS-MAKING

OSWALD-XL

The clear-textured countertop and head board of solid wood cater to the weight feeling required by Oswald-XL; the feather edge process that enables a 5mm hollow-out along the rims of the back cabinet and side cabinets brings a visually clean and neat look; a solid foundation is the natural center of the surrounding environment, and a symbol of reliability and durability.

OSWALD-XL

OSWALD-XL

PELE

Pele series abandons the complex stacked elements. Through the ultra-thin oblique cutting edge design, the original 25mm thick desk board is created as a desk edge with only 5mm thickness. Without a redundant detail, it can ensure the firmness, let the overall look sleek and natural. It exudes a clean sense of art from the inside to the outside.

HIGH-LEVEL DECISIONS-MAKING

PELE

PELE

PELE

It continues the multiple use of material, thin desk edge, aluminum alloy foot of the desk from Pele. In the most simple form, with the least "visual noise", it expresses the attitude of concentration, creating a warm meeting atmosphere between the simple and neat lines, and bringing a sense of ease to a fast pace of work.

The administrator's room is one's private space, and also the target card. It is a look for meditation. We use high-quality wood and high quality hardware fittings to create a unique sense of security. When integrated with this office desk, the entirety gives off a sense of trust and credibility, which is especially true in its elegant hues and low profile appearance.

TARGET

Simplicity is not the same as simpleness. Every detail is an ingenious art crystallization, which is an improvement of quality in itself.

TARGET

HIGH-LEVEL DECISIONS-MAKING

The design of the [Lavi] case desk has produced a strong three-dimensional sense, combined with the fine and exquisite technology and exquisite manufacturing technology, to creating the aesthetic feeling of modern art, so that the office environment doubled the calm and style.

LAVI

EDDY

The Eddy MFC lifting platform has an intelligent lifting function to help employees get rid of the constant working state, provide more working posture, bring abundant vitality and spirit to the working state, and shape a healthier body and mind.

EDDY

BRIC SOFA

The Bric sofa is designed by ONMUSE and Spanish designer Javier Moreno. Through the full and inclusive round shape and the functionality of supporting a variety of modules, it draws away the natural and comfortable home atmosphere from the working environment and arouses emotions to stimulate creativity.

EXECUTIVE CHAIR

The Talking chair is the first bow chair designed based on ergonomics. On the curved chair back frame, clean and streamlined chair frame, gives a person curve smooth, the aesthetic feeling of unity. As a comfortable and exclusive meeting chair, the high-quality appearance and comfortable hand feel will make it one of the most ideal choices.

Fit leather chair, absorbing the essence of Italian simplicity, elegant and light appearance design, made of selected leather material, to convey a crisp business wind, improve the quality of office environment.

MIX SOFA

The shape design of bread cubes, with different colors, is the most flexible highlight of Mix series. The arbitrary modules are combined freely, making the space more flexible.

From open and collaborative areas to quiet leisure places, office furniture is more conducive to stimulating employee innovation when it can adapt to different scenarios and focus on the needs of employees.

No matter whether it is for internal communication or external cooperation, freedom and innovation of Modulli define a new form of office. In fact Modulli is more than a combination of modular couches, and it is born based on an awareness of breaking the traditional working mode.

MODULLI SOFA

SHAPE CHAIR

Shape Chair is a multi-function seat series, through a visually memorable, round edge and overall 3D curved change of the chair body, with various chair feet and handrails, can be applied to training, restaurant, conference, education and other multiple use scenarios.

The elegant design of the chair and the ergonomic back radian taken into consideration provide excellent comfort for the user. The elegant shape makes it the perfect training chair, while also applying to a variety of dining or outdoor and indoor leisure areas.

SMILE SOFA

The friendly reception area should wait for time as possible visitors to make it pleasant. They play an important role in the comfort and function of charming modular areas of sofas, providing privacy, leisure and reading or work. And through a variety of shapes, materials, colors and accessories so that you can work in a relaxed atmosphere.

LOUNGE CHAIR

MALMÖ CHAIR

LOUNGE CHAIR

Shelly chair has different styles. Its overall appearance is slender, soft lines, just the right appearance curve makes it show meticulous comfort. The thin design of the back and armrest is slightly wrapped inward, catering to the body's dependence, giving the user a maximum degree of comfort.

CHANGE BETTER

The change of the concept of global office space derives not only from the continuous increase of knowledge-based workers around the world, but also the higher demands of the new-generation workers on space environment, color acoustics, collaborative sharing, and so on. With a close eye on these new values and design trends, ONMUSE strives to work with international original designers to provide more user-friendly products for the present and the future office space industry.

Over the past two decades, with a firm reliance on the industrial platform for deep manufacturing, ONMUSE has devoted itself to cultivating industry-related supply chains, and to introducing American intelligent manufacturing software and professional furniture ERP software. Meanwhile, by following a quality concept of whole process management, ONMUSE makes sure that quality awareness is embedded in each link from the selection of supply chain to R&D and design, production manufacturing, and clean packaging. It is ONMUSE's belief that original design plays a crucial role in leading the brand onto a truly international development path. Under such a background, ONMUSE started to cooperate with international excellent designers since 2016, to re-plan a brand new product line which caters more to the international office trend by adopting a modern, simple design language and an overall aesthetic effect of space as the clue for product line planning. Even if to change from a manufacturing platform to a distinctive, excellent brand in the international market is more of a long and tortuous journey than just a vision, ONMUSE team has adhered, and will adhere to its initial intent firmly and bear the weight on the go.

Be elegant your office lifestyle.

Synopsis

PRODUCTION

ONMUSE holds that a good office experience comes from products of stable quality given by an excellent and stable supply chain and a highly intelligent modern production line. In 2007, ONMUSE invested in the first-generation industrial park in Guangzhou Baiyun District, since which time it has gradually expanded its production line from single rubber sheets to a multi-dimensional production environment of hardware, solid wood paint, high compartment, soft body and pure solid wood, having laid a firm and solid foundation for the development of a more extensive product line for ONMUSE.

DESIGN MANNER

It is ONMUSE's conviction that the craftsmanship of any industry comes from original design, and that a product is to be appropriately designed after being carefully studied its use in the space and the user's needs. With this in mind, ONMUSE has established a brand and product center, where a professional team conducts meticulous management over product design requirements. It has also extensively cooperated with outstanding designers at home and abroad to carry out original product design in a way that is more in line with ONMUSE's understanding of space philosophy.

WOOD

Wood is a priceless gift from the nature. With the utmost caution, ONMUSE selects the most suitable wood, and adopts the most reasonable design to ensure the fullest use of the wood. With the help of the upstream supply chain, we implement strict control and FSC forest certification tracking and tracing on such properties of wood as hardness and water content, ensuring good quality of products as well as safeguarding environmental sustainability.

MFC PLATE

With German Schattdecor's melamine paper as the surface material, and basic shaving board materials with international environmental protection certification, and through its own strictly-controlled internal hot pressing and cold pressing processes, ONMUSE ensures stable quality of its plate furniture products. At the same time, by following the trend of international decorative colors, ONMUSE strives to keep abreast with the international design trends in iterative update of MFC surface materials, to provide a crucial artistic choice for modern office environment.

HARDWARE

Metal manufacturing line is an important production focus of full development by ONMUSE in its early days. With a processing history of steel gantry and metal products of 18 years, ONMUSE has occupied a leading market share in the office steel gantry market with products exported overseas in bulk. While hardware production line includes deep self-processing capability, covering such areas as steel products welding, metal casting, polishing and oxidation plating, elbow hardware, automatic spraying and so on, where deep internal self-processing ability brings stronger quality control competencies and greater cost performance.

ACCESSORIES

The past 20 years of experience in sedimentation and accumulation gives ONMUSE a deep lesson that even a most negligible screw fitting, door hinge, guide rail, and handle constitute important details of brand quality as well as core elements of product life. Thus ONMUSE has long insisted on eliminating and upgrading all types of accessories including small hexagonal screws, to ensure that its brand quality is being continuously optimized.

HANDMADE

Public leisure areas and various software products stand as important segments of modern office environment. As early as in 2011 ONMUSE had began to create a software workshop, and gradually optimize the capacity and equipment of the production line. By employing export standardized multi-layer boards and sponges with rich density difference on internal frame of the soft product, ONMUSE has succeeded in uplifting the outlook and the practicality of the products. It also lies in ONMUSE's knowledge that surface materials play a decisive role in soft body products, thus it strives to provide customers with a more professional way of use of soft fabrics through professional research and verification. For different series of products, ONMUSE selects different fabrics correspondingly to produce office software products in a more professional way.

QUALITY

To ONMUSE, quality stands above everything else. Quality is the soul of the product., whereas each and every product has its own story. The symbol of product is what withstands the test of time; it is not a label, but a culture of the brand. Dedicated to producing good using experience for all ONMUSE furniture users, we strictly abide by the ISO: 9001 enterprise production quality management system. In all production aspects from self-manufacturing production end, to upstream supply chain of raw material cooperation, and quality consciousness of the employees themselves, we have been closely and conscientiously following the creed that "quality is above everything else"

Editor in ONMUSE Brands Department

Environmental Sustainability

We, ONMUSE, and our upstream suppliers, in the whole production process from design to production implementation, have been closely following the philosophy that the impact of our production on the environment meets the goal of sustainable ecological development. Since the founding of the company, we have been committed to minimizing the impacts on the environment from design to delivery, while ensuring a healthy working environment for our employees.

1

Executive

Stone

The marble table leg is structurally simple, but also visually conveys a feeling of transparency, highlighting an imperial manner that users reign over the world.

Win

Deal

Deal German series inherits the usual German style of high-end administrative products with clean and cool appearance as well as exquisite wood grain, revealing deep strength. Besides, the special desktop power module storage system endows the whole series with more artistic and aesthetic visual embodiment.

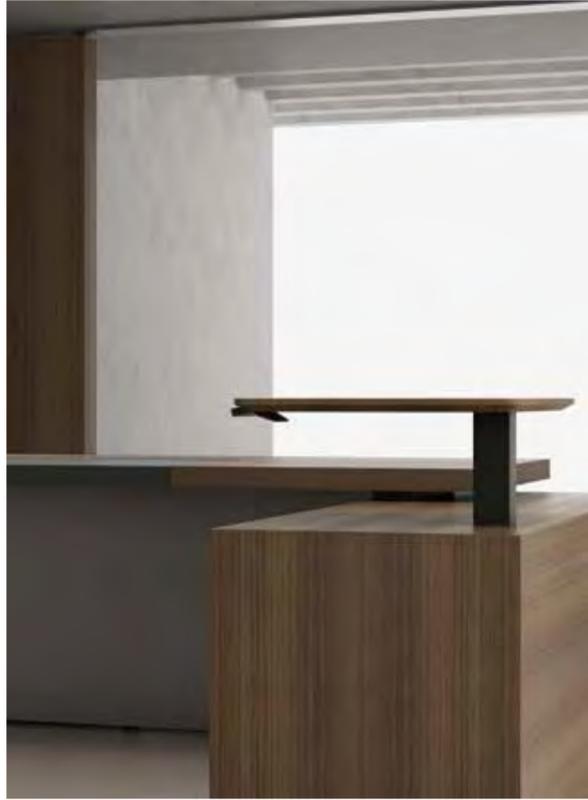

Wise

Wise is named from: "Benevolent people are happy with mountains while wise people are happy with water". Water is remarkably inclusive, like the vast mind of the enterprise leader.

Wise series is designed by the famous independent furniture designer Zhao Yun. Considering to cater to the market, we need to have a new high-end administrative series with high recognition, thick sense and strong sense of encirclement of new state-owned enterprise, so Wise series comes into being.

Decisif

The DECISIF series, made of solid walnut, has a solemn and grand design, which represents a character of being decisive, determined and courageous after careful considerations.

Innovative design brings an elegant visual effect delivering independence. DECISIF, an eye-catching product. First, the clean and neat lines around the table bring a simple and elegant appearance. Second, the table legs of pure solid wood deliver a feeling of being firm and courageous; the high-quality lifting system enables the product a unique function, which provides clear need of users.

Ray

The RAY executive desk is inspired by the art of origami. Still, instead of paper, it appears as if a quick fold of hard metal, making it light but highly stable, like an enterprise moving forward with wise and decisive moves.

METALLI is the Finnish word for metal. Metal is a lustrous and malleable material with many other properties. The desk is hard and metallic, a combination of static coldness and dynamic agility, which is sleek and sophisticated. The designer extends the steel legs of the desk on the back cabinet, making them thin but full of metal quality; reflective stainless steel trim with milled groove handles are clean and cool.

Metali

Harry

The metal geometric table legs bring out substantial visual impact and a sense of power. HARRY is a marriage of stainless steel legs and solid wood that can express a rigid character.

Time

"TIME - The tribute to the lost time" series, which is office furniture that incorporates modern styles, endows the modern office space with a rational workplace atmosphere. The combination of walnut and black leather adds a touch of calmness to fashion, which is more in line with modern manager's style. The side table is designed with drawers, a mainframe cabinet, partition plates, etc., which make well-arranged storage space possible. The relaxing and calming design can meet the office needs of users in different industries. One's career is like a pilgrimage, and only time can give you the final answer. The way ahead will be long, and you will keep going calmly and firmly.

Tarot

The administrator's room is one's private space, and like the tarot card, it is a tool for meditation. We use high-quality wood and high quality hardware fittings to create a unique sense of security. When integrated with this office desk, the entirety gives off a sense of trust and credibility, which is especially true in its elegant hues and low profile appearance.

Pele

Pele series abandons the complex stacked elements. Through the ultra-thin oblique cutting edge design, the original 25mm thick desk board is created as a desk edge with only 5mm thinness. Without a redundant detail, it can ensure the firmness, let the overall look sleek and natural. It exudes a clean sense of art from the inside to the outside.

Action

As we lead the team forward, we hope that we could leave behind all the troubles and start afresh from the beginning of our dreams.

It redefines the collaborative office space today with a relaxing modern style, allowing you to bring personality and beauty to modern workplace.

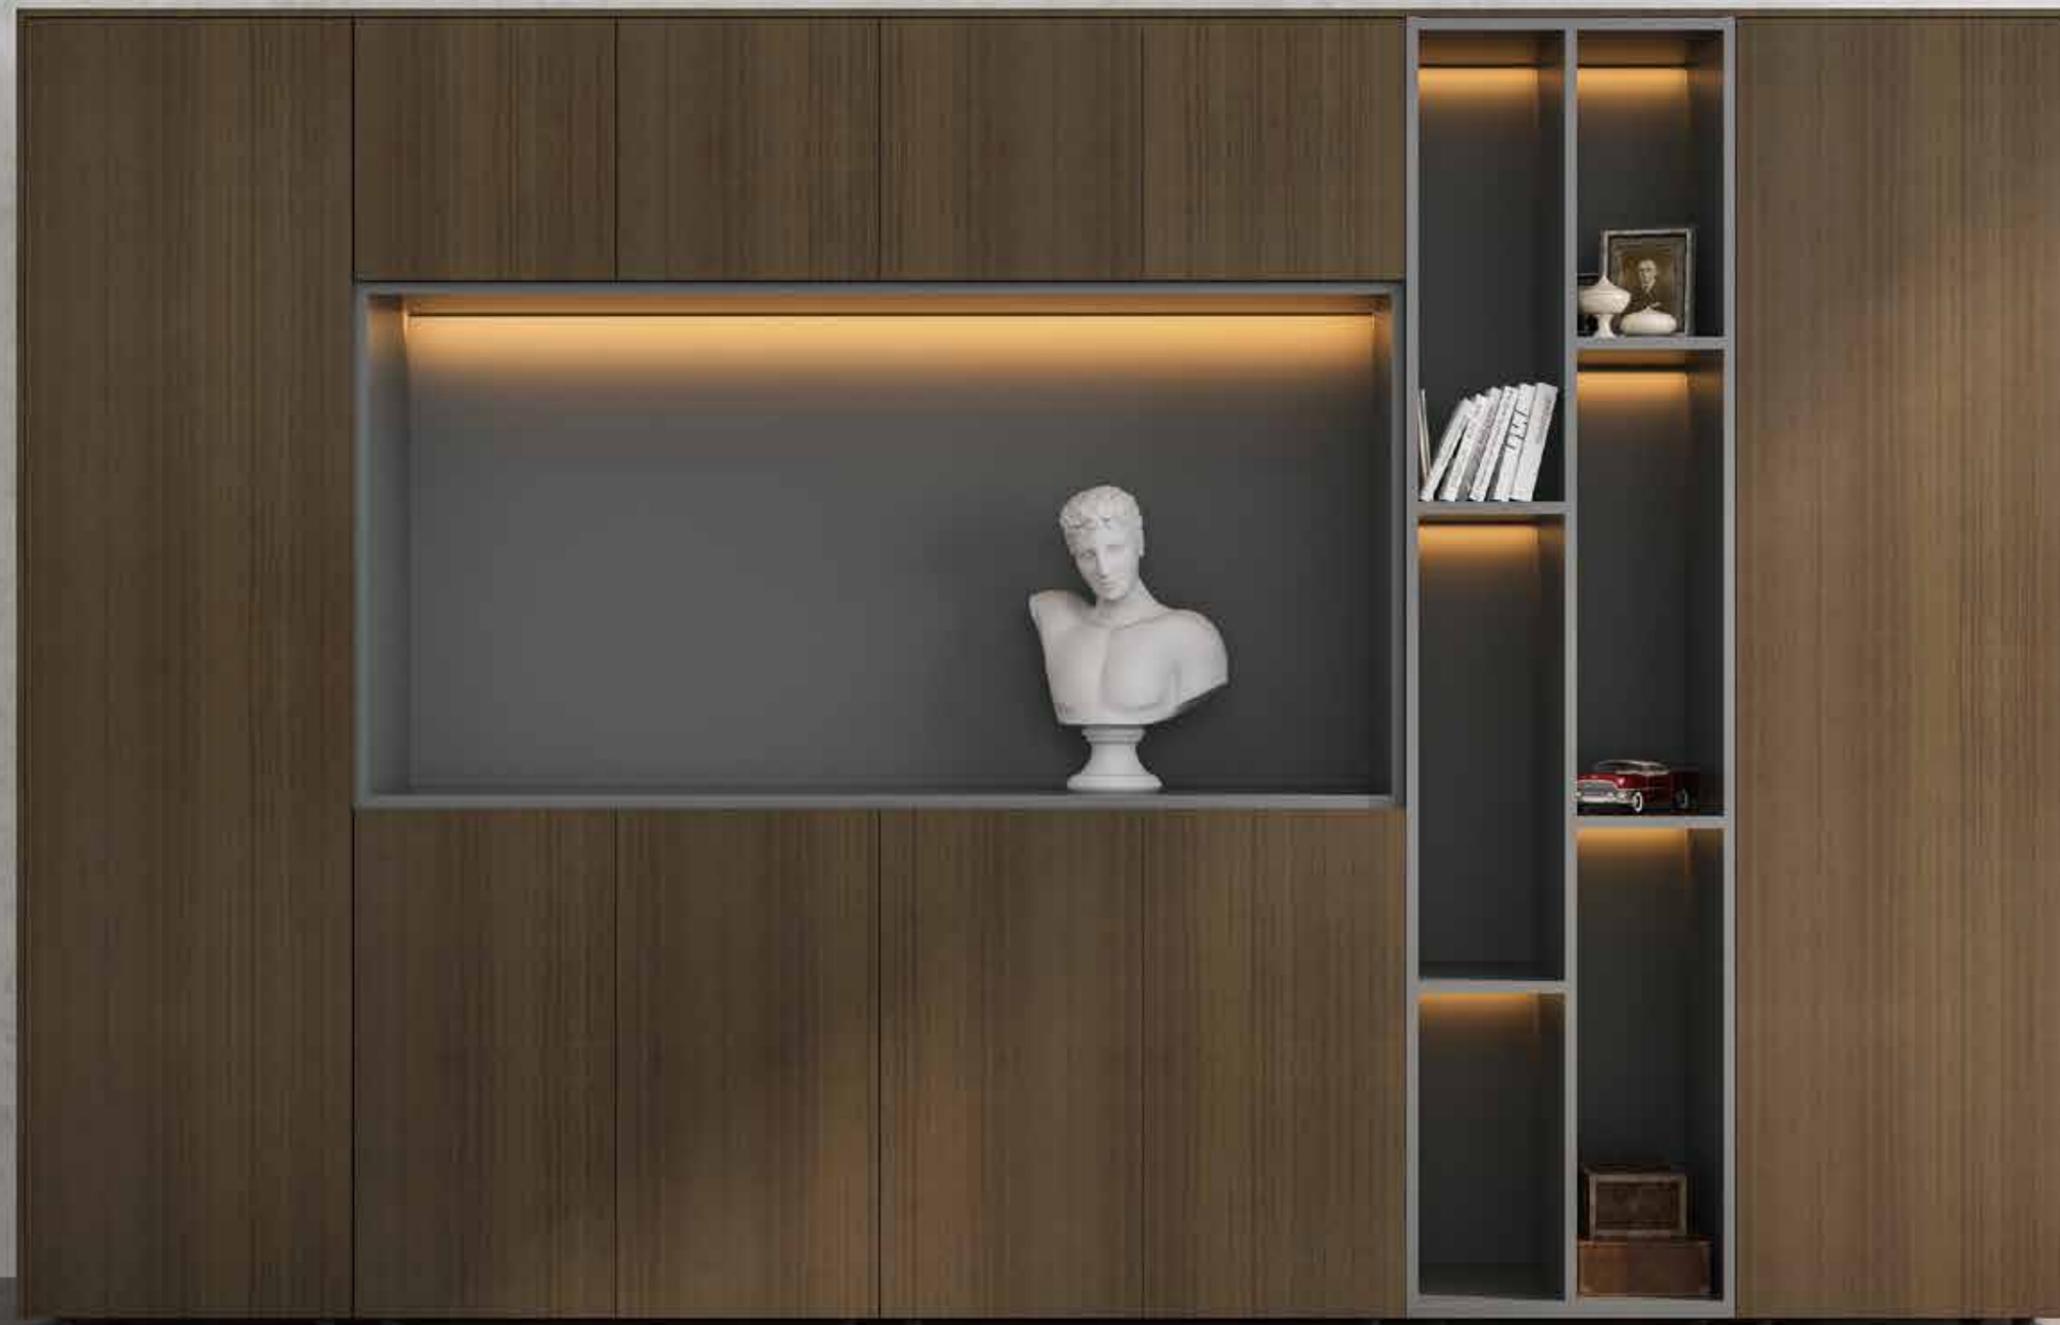

Next

The NEXT series is a series of products with steel-wood structure developed by ONMUSE in collaboration with renowned original designers. The design as a whole is quite diverse and user-friendly: the wave-shaped screen and door plank, the simple matte black handle, and the color scheme that conforms to the philosophy of spatial planning, etc. Making the NEXT series more modern and accessible.

The NEXT series is a huge system that covers the application of administrative space and the extension of the leisure area. It redefines the collaborative office space today with a relaxing modern style, allowing you to bring personality and beauty to modern workplace.

Journey

Journey is a solid wood and board type combination of the administrative high cabinet. The cabinet is equipped with hanging clothes pole, induction lights, multi-treasure case drawer and so on, the handle also uses high quality stainless steel finish handle, to meet the administrative manager more flexible storage needs.

Tag

As a diversified modular administrative high cabinet, Tag presents a strong visual effect and design beauty. The combination of different styles and color collocation provide more storage functions and visual beauty for the space of administrative managers.

Alien 阿利安

Mandy

The Mendi sofa is a modular executive sofa. Different combination of ways, suidesk for different space composition, high-quality sense of down filling, so that the sofa sitting sense to get the most comfortable experience.

Phil

Simon

The Simon sofa has a wide cushion and backrest, soft and comfortable, and the design of a whole piece brings users a full sense of security. The position of the armrest uses the process of turning edge, making the line more clean and clear.

2

Conference

Power

Like a reassuringly solid bridge over a wide river, with just two legs supporting a long, heavy table, POWER conveys a strong determination through its impressive physical presence. It represents a convincing belief that bridges the gap between thought and decision making. Every victory begins with a meeting that sends a powerful message.

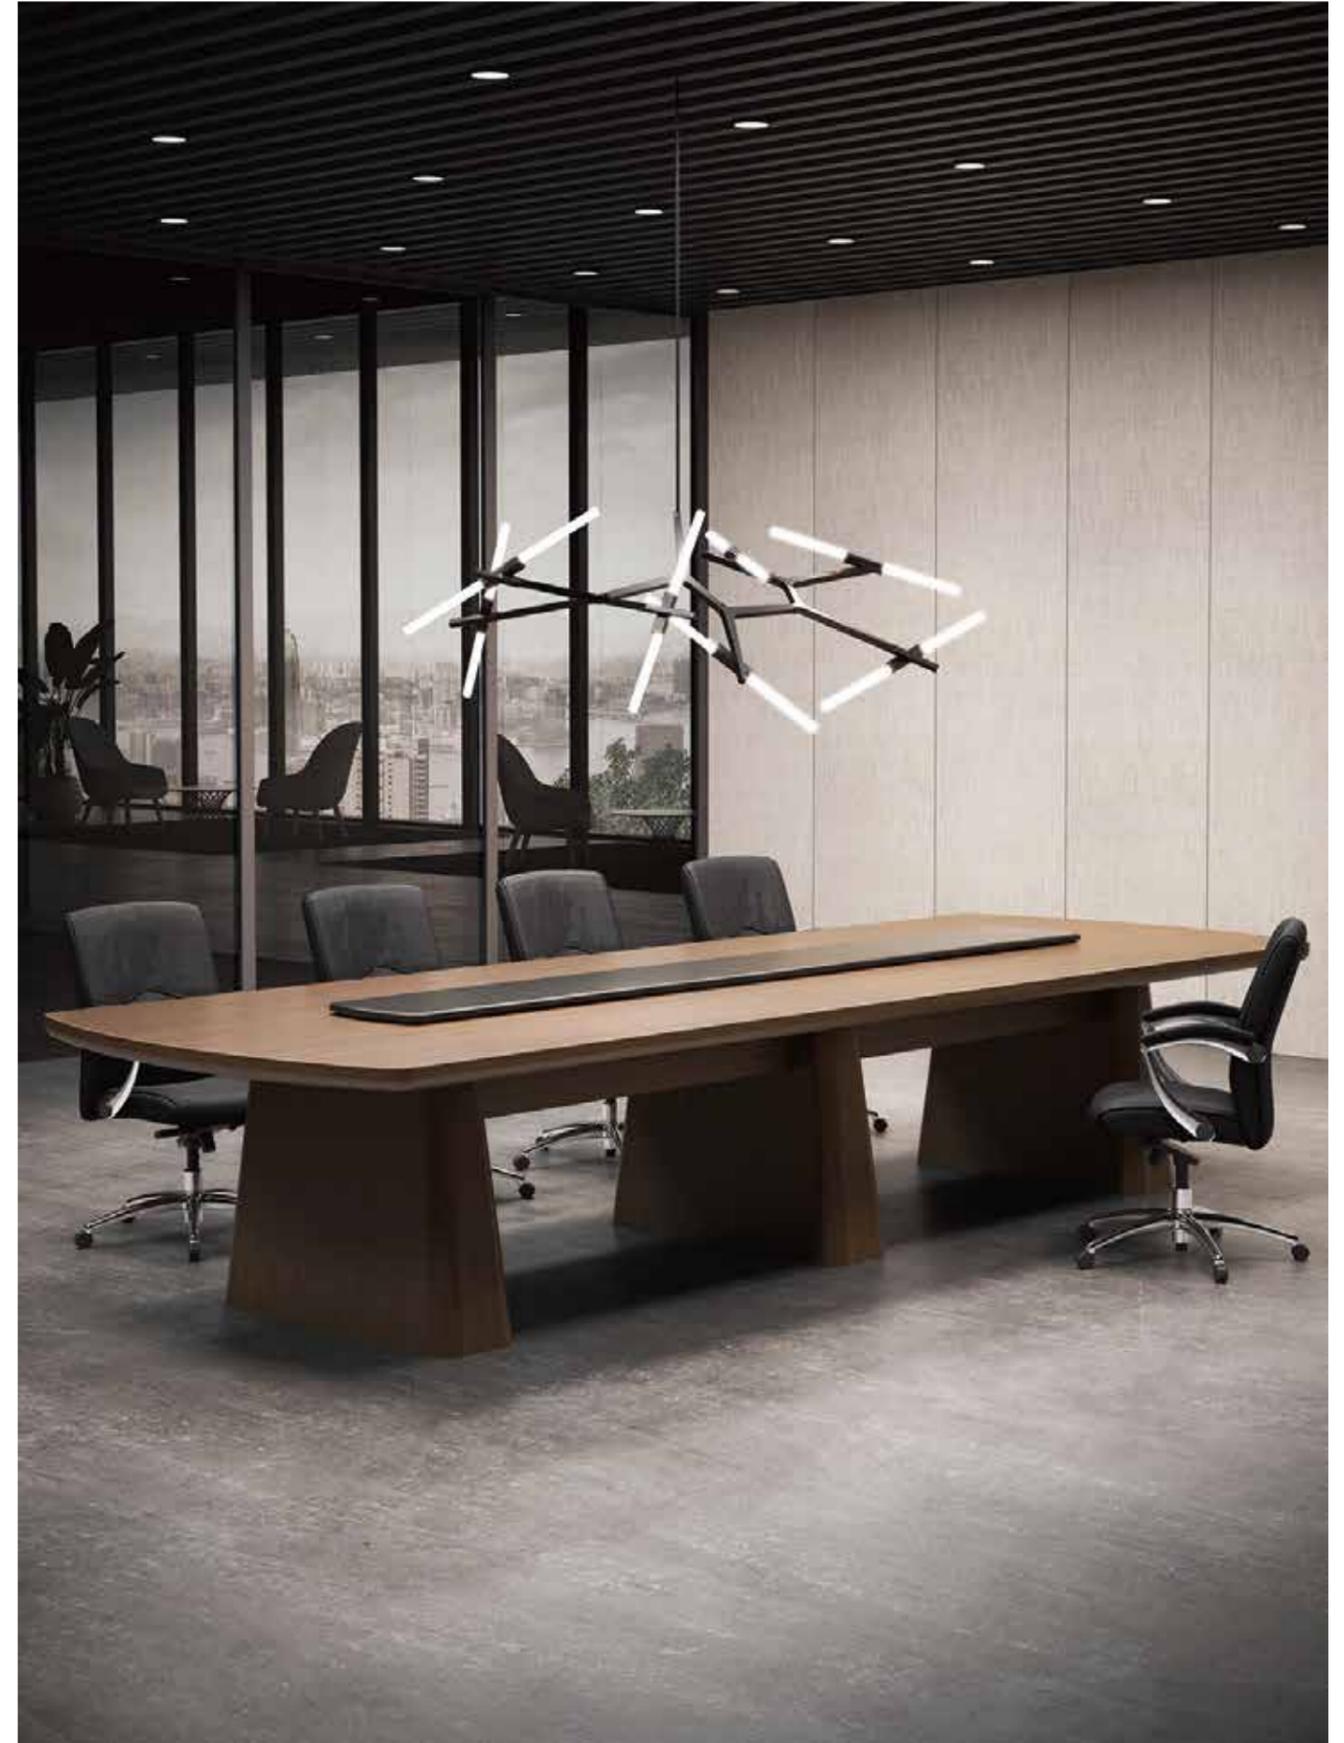

Better

The silver-colored legs contain the power of agility, technology, and a variety of lines while providing stable and straightforward support for the large countertop. As the best choice of the conference table for professional multimedia space, BETTER demonstrates its own brand with its minimalist design.

Wise

High quality rock plate and brass color decoration not only consider the habits of the user from the structure, but also visually convey its transparent meaning, highlighting the user's king style of the world.

Time

The unending quest for calmness and confidence helps companies make better decisions. Simple and effective conference table legs provide storage for all wiring and conceal convenient access to power and media through brushed stainless steel tabletop covers.

Sams

Sams is also a conference desk that combines the elements of the new Chinese style. The overall modelling is square, thick, but does not break rules and sedation again.

Pele

It continues the multiple use of material, thin desk edge, aluminum alloy foot of the desk from Pele. In the most simple form, with the least "visual noise", it expresses the attitude of concentration, creating a warm meeting atmosphere between the simple and neat lines, and bringing a sense of ease to a fast pace of work.

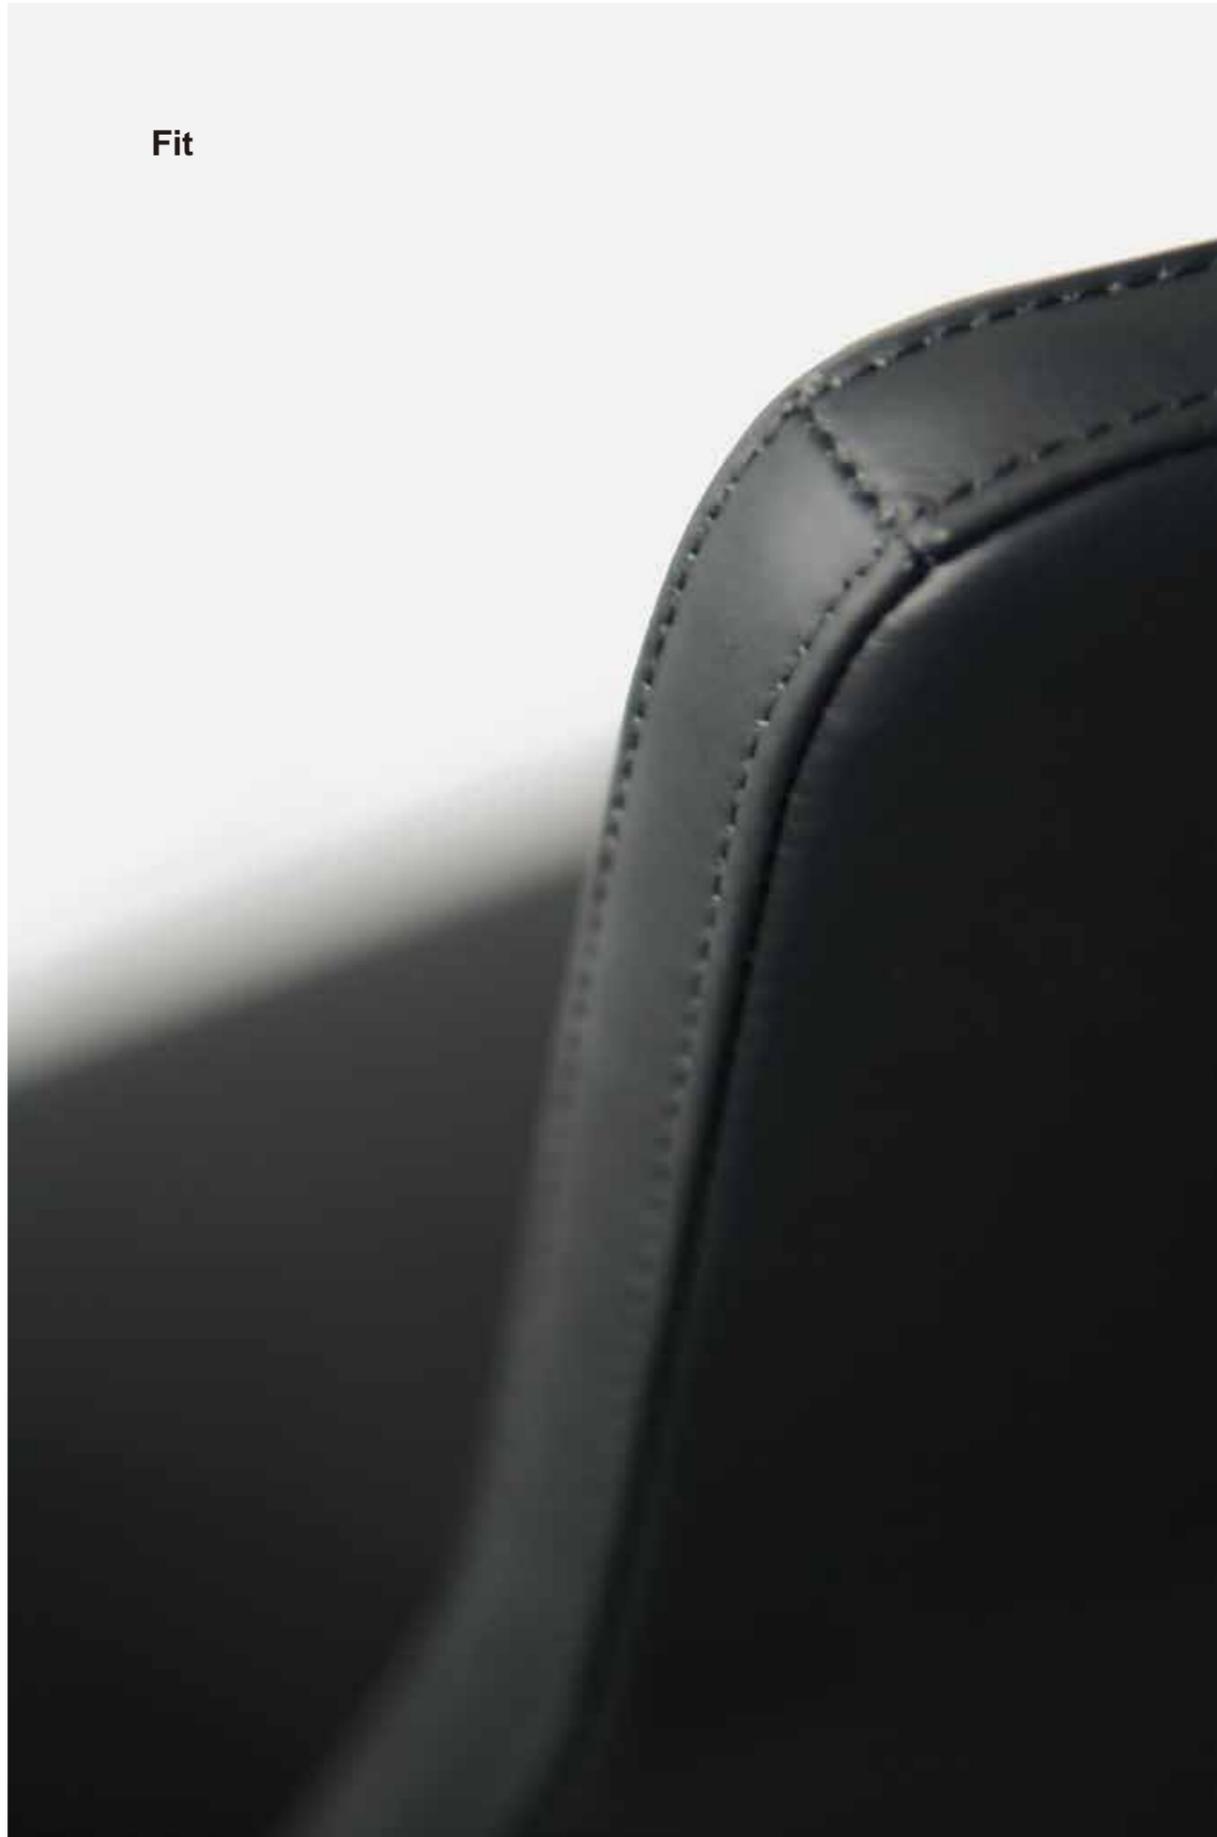

Action

Decisions made in a meeting require immediate execution. The natural geometrical shape of the legs, like a metallic liquid flowing downwards, symbolizes the decisiveness and efficiency of the executor.

Fit

Fit leather chair, absorbing the essence of Italian simplicity, elegant and light appearance design, made of selected leather material, to convey a crisp business wind, improve the quality of office environment.

Vidi

Talking

The Talking chair is the first bow chair designed based on ergonomics. On the curved chair back frame, clean and streamlined chair frame, gives a person curve smooth, the aesthetic feeling of unity. As a comfortable and exclusive meeting chair, the high-quality appearance and comfort hand feel will make it one of the most ideal choices.

Volta

The Volta series is a unique and innovative workstation system. Developed and developed by JRS Design Studio in Belgium. Both visually, or in the function will break through the existing workstation methods.

Fresh screen, classic but creative line layout, full of green nature breath of the work storage, will bring a unique, surprising experience.

Shure

Neck and back problems as chronic occupational diseases have been increasingly plaguing businesses and reducing the creativity and productivity of teams. Ergonomic chairs cannot solve all problems. But a reasonable alternation of standing and sitting is what leads to better health and well-being.

It redefines the collaborative office space today with a relaxing modern style, allowing you to bring personality and beauty to modern workplace.

Next

The next series is a series of products with steel-wood structure developed by ONMUSE in collaboration with renowned original designers. The design as a whole is quite diverse and user-friendly: the wave-shaped screen and door plank, the simple matte black handle, and the color scheme that conforms to the philosophy of spatial planning, etc., making the NEXT series more modern and accessible.

Next

The NEXT series is a huge system that covers the application of administrative space and the extension of the leisure area. It redefines the collaborative office space today with a relaxing modern style, allowing you to bring personality and beauty to modern workplace.

Doit

Doit series is the product of ONMUSE winning the Red Cotton Award. The biggest difference of this series is the adjustable desk steel feet, for which we have also applied for structural and appearance patents. Doit series of clean appearance, comprehensive functions, is a collection of beautiful, practical as one of the product series, very suitable for the new generation of young business leaders.

RICK

Boon

Boon is our star-driven all-plywood staff system. This series of product line extension in 2022, currently there are executive desk, 120 employees, sitting staff, media staff, conference desk and other styles available.

Basically covers the current market of plywood products can do all the styles. We give it the positioning is a broad product line, and highly cost-effective. According to different corporate culture and space needs, we can flexibly meet different working methods.

Brings a quick and easy experience at your fingertips. The application of new environmentally friendly materials refuses to be stereotyped, but it is a maverick existence.

Screen

The classic aluminum and steelscreenwork stations have become closer to the modern office space due to the color and personalized collocation. The flexible routing method inside the screen brings a quick and easy experience at your fingertips. The product package of the leisure meeting fully supports the flexible switching of users to focus on individual or teamwork communication mode. The application of new environmentally friendly materials refuses to be stereotyped, but it is a maverick existence.

Besimple

BESIMPLE series is a storage system, which covers the storage of employee space, different styles and height of storage cabinets, to meet the needs of the space, personalized 45 diagonal cut hands, reduce the presence of the metal handle, let the important but do not need to highlight the employee storage in the space look coordinated and orderly.

Bella

With the addition of Bella series, employees can have more choices in storage. In addition to the ordinary thin side handle movable cabinet, there are also movable under table side cabinets and employee high side cabinets used with lift tables.

Una

This product comes with armrests with the same tilt and self-supporting basis. Whether you are standing upright or kicking back to relax, you can be at your most relaxed state through the adjustment of seat height, depth, armrests, lumbar support, tilt, and other ergonomic parameters. UNA is the most brilliant and elegant presence in your office, with no more complications and no fewer details in the design.

Wine

The Wine Chair is a staff web chair independently developed by ONMUSE and put into the mold. Its appearance is not too much decoration, each line is designed to maintain the best user comfort. The overall streamline sense of the chair is repeatedly compared by the designer, and the design of the back seat shell with the bow line makes the pelvis upright, fit the back shape of the waist, and the capacious width of the seat, so that the spine maintains a natural S-shaped line, so that the body can experience just the right comfort.

Collaboration

Bric

The Bric sofa is designed by ONMUSE and Spanish designer JavierMoreno. Through the full and inclusive round shape and the functionality of supporting a variety of modules, it draws away the natural and comfortable home atmosphere from the working environment and arouses emotions to stimulate creativity.

Sofa, a place that gives us a sense of belonging and tranquility, allows you to obtain unique inspirations by huddling up inside. It is a place where you can relax the body and mind so as to improve work efficiency, as well as a place that facilitates communication and discussions among colleagues, thus achieving collaborative interactions.

No matter whether it is for internal communication or external cooperation, freedom and innovation of MODUULI define a new form of office - in fact, MODUULI is more than a combination of modular couches, and it is born based on an awareness of breaking the traditional working mode.

Moduuli

Smile

Sofa, a place that gives us a sense of belonging and tranquility, allows you to obtain unique inspirations by huddling up inside. It is a place where you can relax the body and mind so as to improve work efficiency, as well as a place that facilitates communication and discussions among colleagues, thus achieving collaborative interactions.

Malmö

Malmö is a leisure chair designed by Mr. Ren Hongfei, a famous original designer, for ONMUSE. Its appearance is characterized by its vivid and smooth lines, and just the right proportion. The back and armrest of the seat are integrated, extending outward from both ends of the seat surface, forming an elegant curve. As a casual chair, Malmö is equipped with a thick stereotyped cotton cushion, soft texture and comfortable sitting. And its scene application functions are also very wide, can be applied to the leisure space, can also be adapted with real leather options in the administrator's room.

Shelly

Shelly chair has different styles. Its overall appearance is slender, soft lines, just the right appearance curve makes it show meticulous comfort. The thin design of the back and armrest is slightly wrapped inward, catering to the body's dependence, giving the user a maximum degree of comfort.

Next

The best quality of logs is reflected in the warmth and comfort that their color can bring to the user and in their grain, which is clearly visible and becomes more historic with age. Even after it has been treated, the charm of its original structure and grain remains.

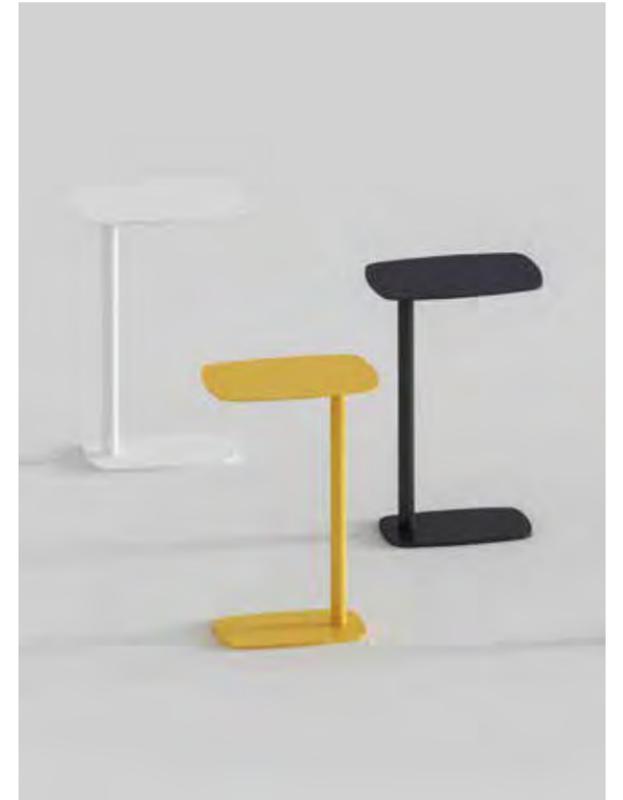

Free

Long Table

Ram & Jason

A series of tables and side tables, creates a perfect atmosphere for sipping tea.

Hem

The desk that tie-in leisure sofa and leisure chair in the office is always inconspicuous but important existence, a negotiation tea desk that gives consideration to height and appearance level, can make whole leisure space look more advanced.

Training

Flex

Cross

CROSS is defined as making intersections and interactions. It is as flexible as the shape of our training table can be. And it brings the team into a meeting space where communication and interactions allow for productive work or meetings. Folded to save space and allow for storage, this training table can easily change to suit the needs of any environment.

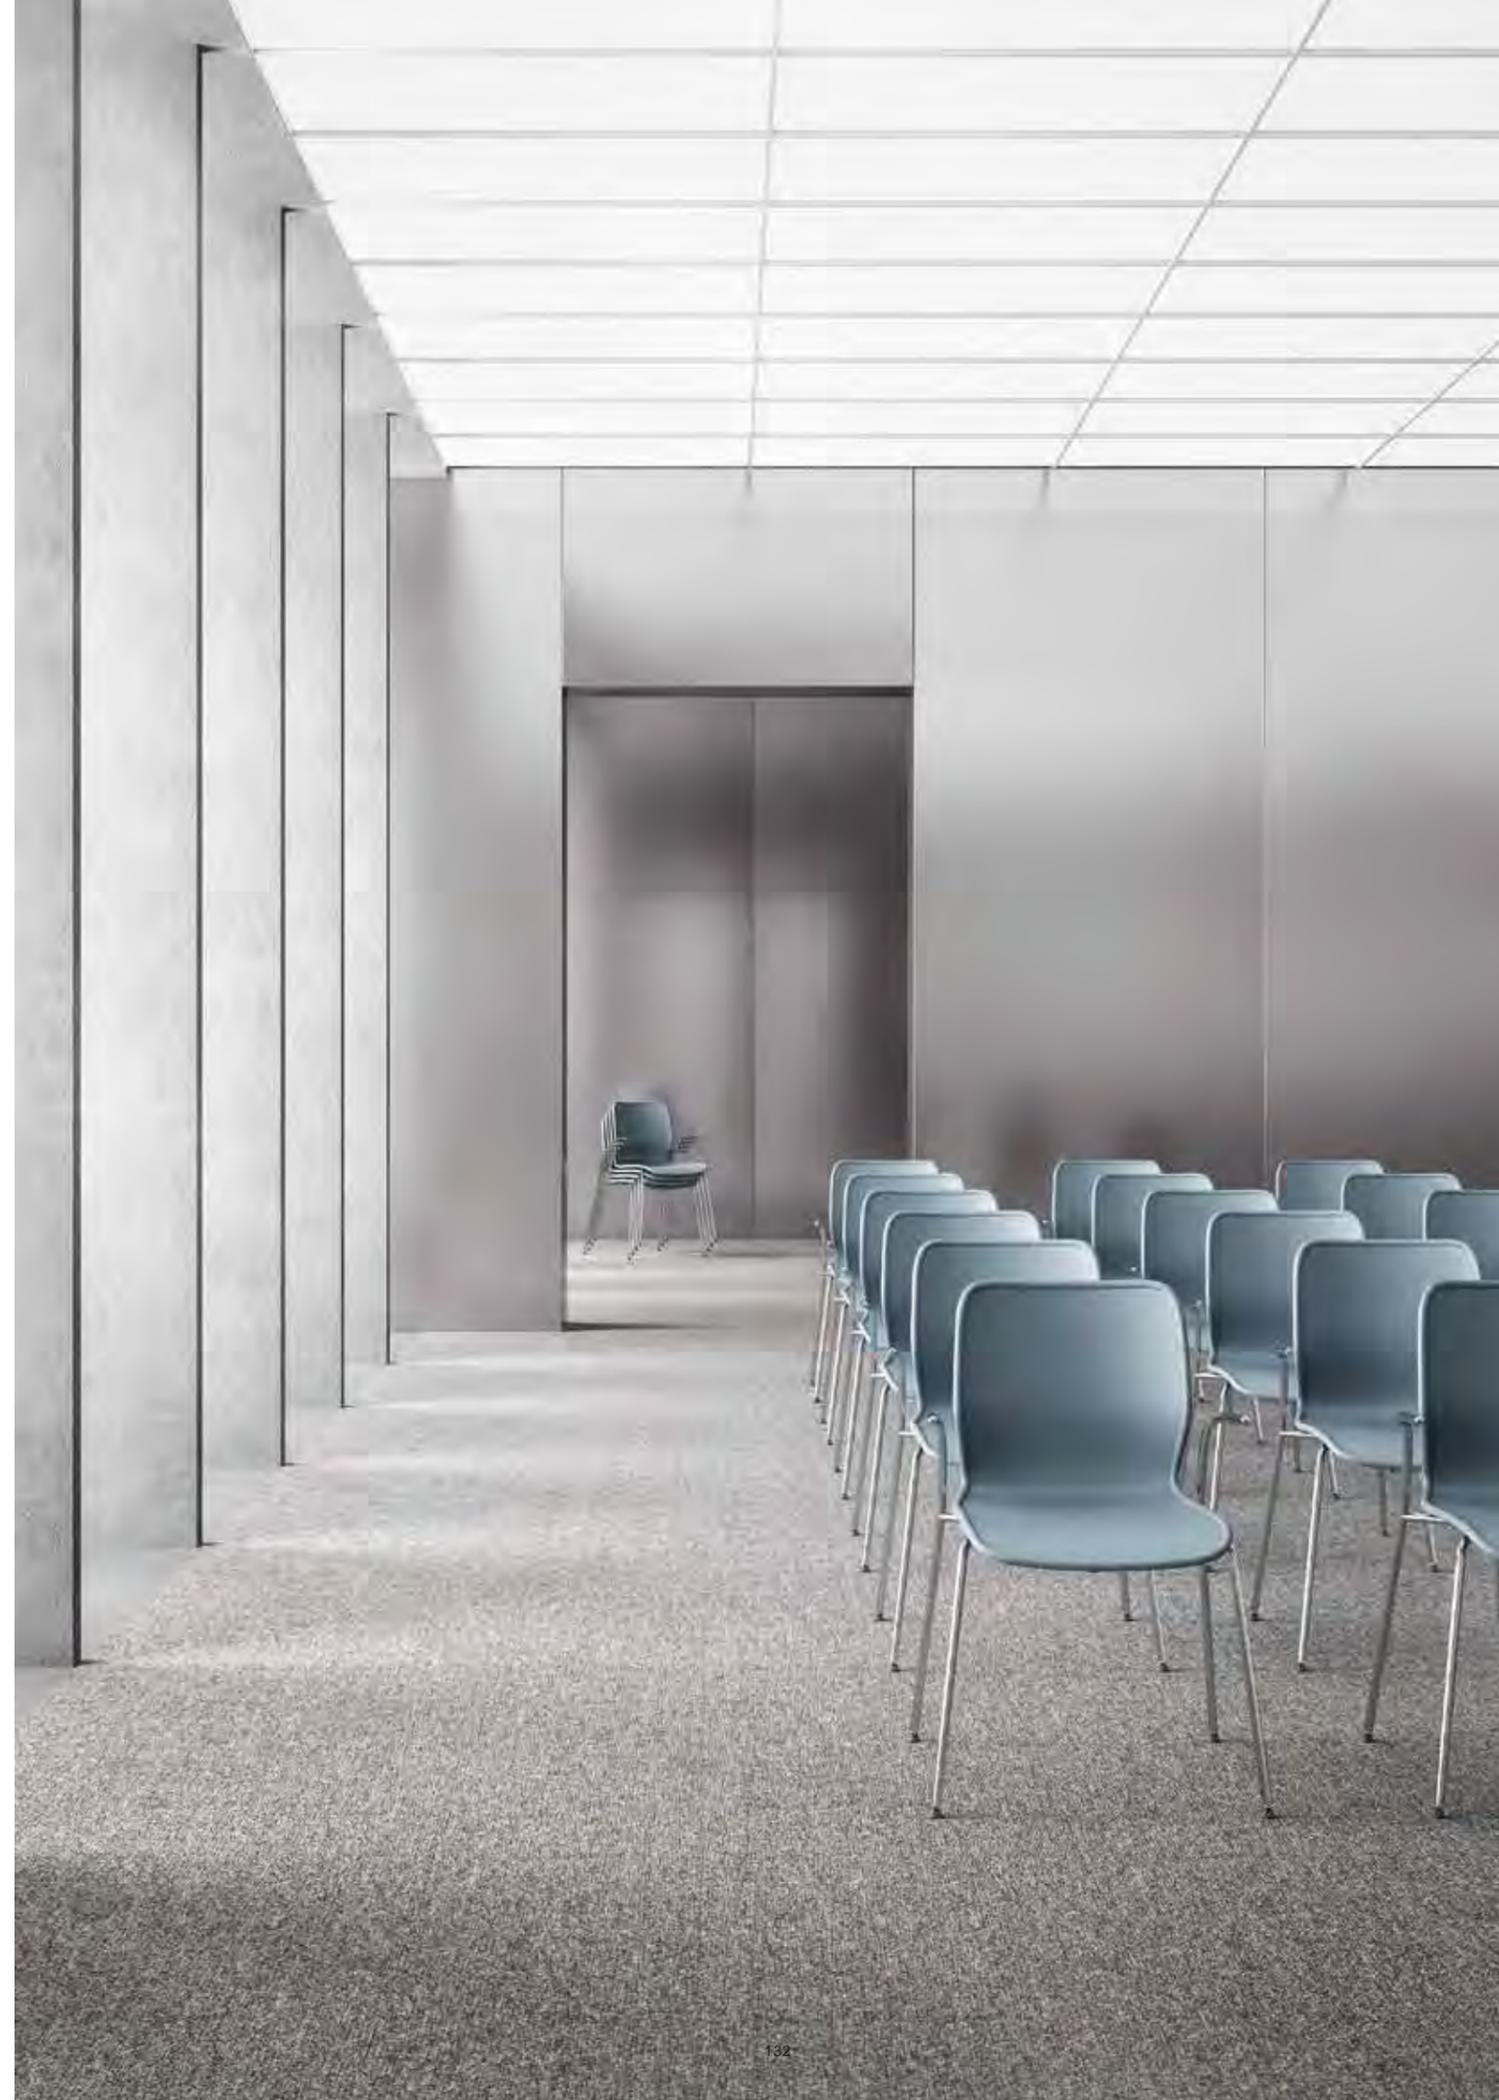

Agil

Shape

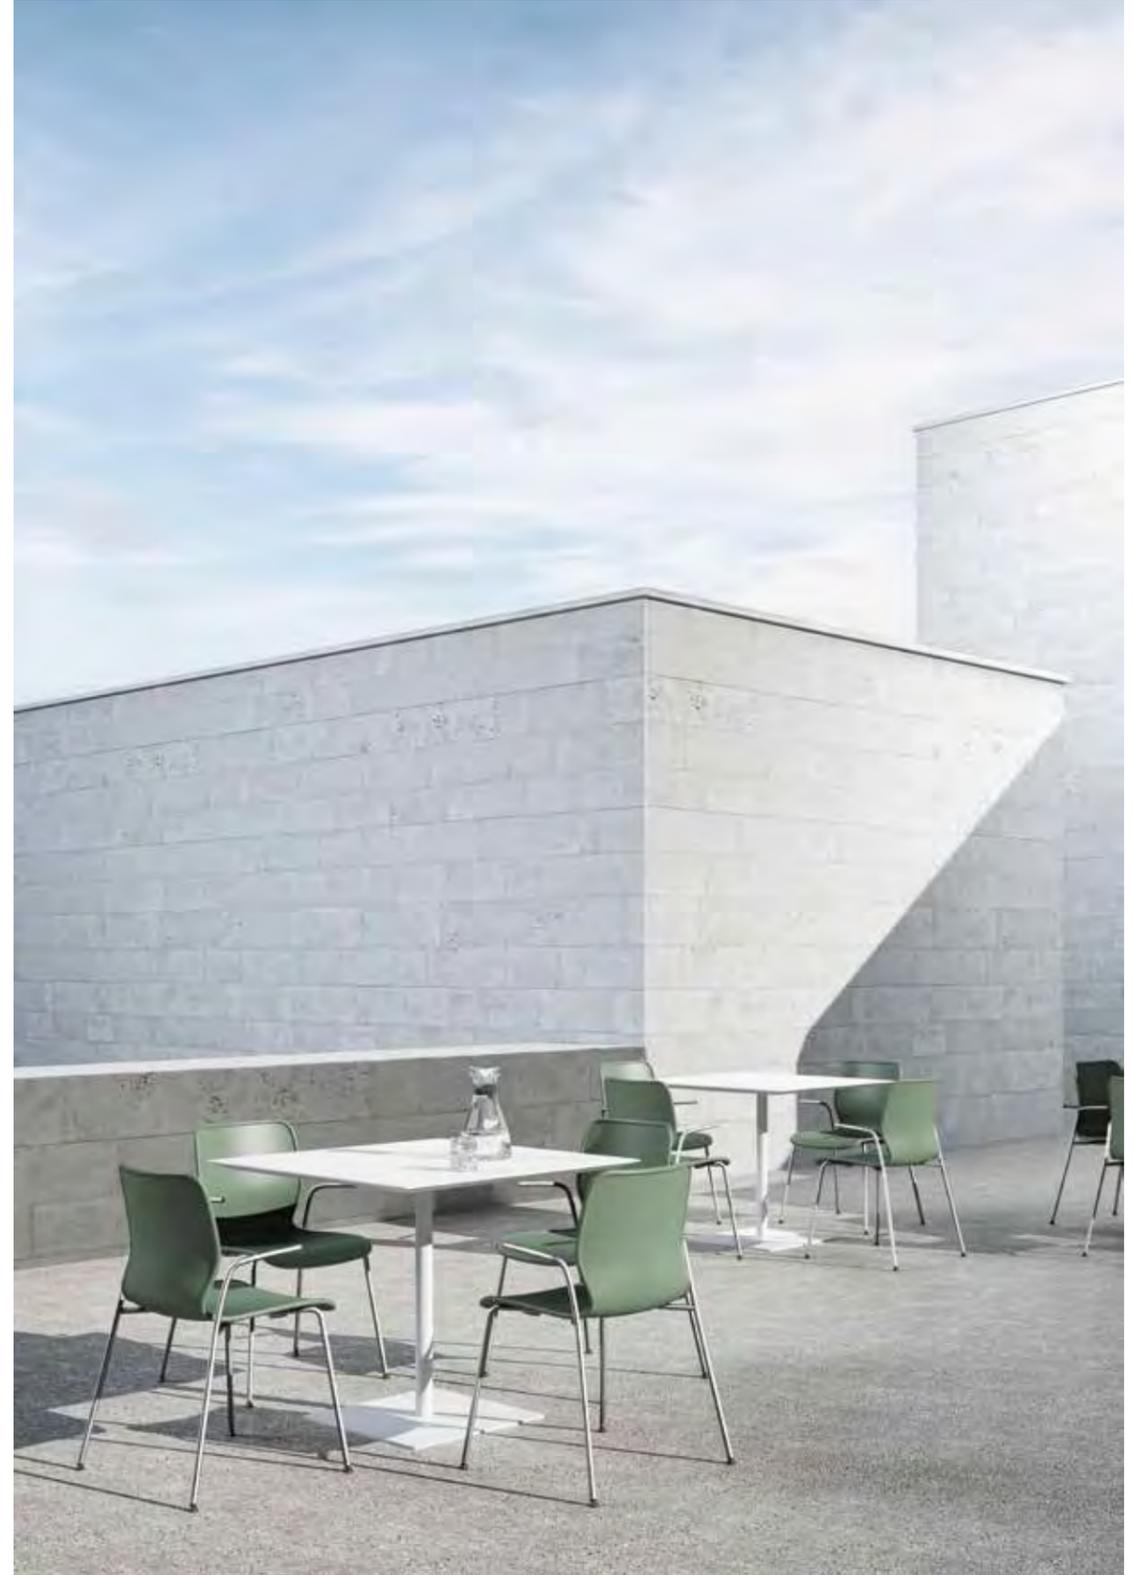

Shape is a versatile seating series that adapts to multiple use scenarios such as training, catering, meeting, and education through a rounded edge that is visually memorable and an overall 3D curved body with a variety of choices for chair legs and armrests.

Shape

The refined design with slightly rolled edges and an ergonomically curved backrest provide excellent comfort for the user. The elegant shape makes it the perfect training chair, but it is also suitable for restaurants or a variety of outdoor and indoor lounge areas.

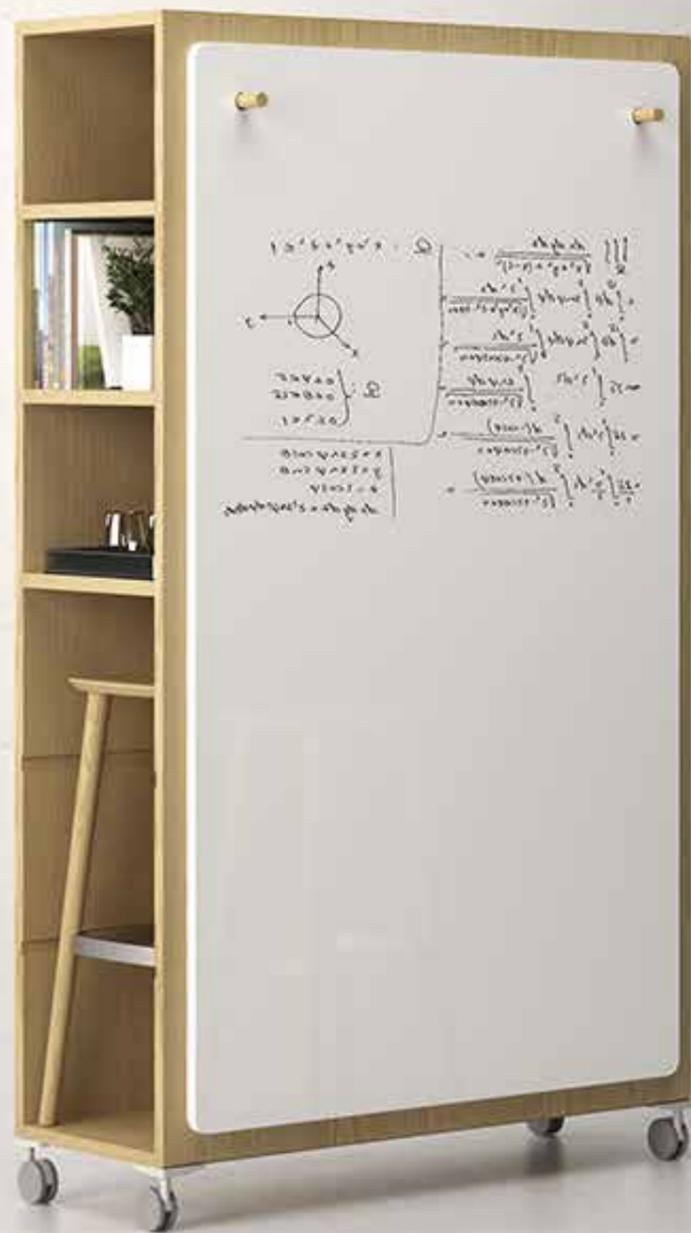

an overall 3D curved body with a variety of choices for chair legs and armrests.

Mobile Storage Whiteboard

From the art of nature, the original ecology retains the wood texture, according to the ergonomic design into the stainless steel material made of hardware foot. Solid wood desk legs use the traditional mortise and tenon technology integrated form, solid and strong gravity.

6

Acoustic

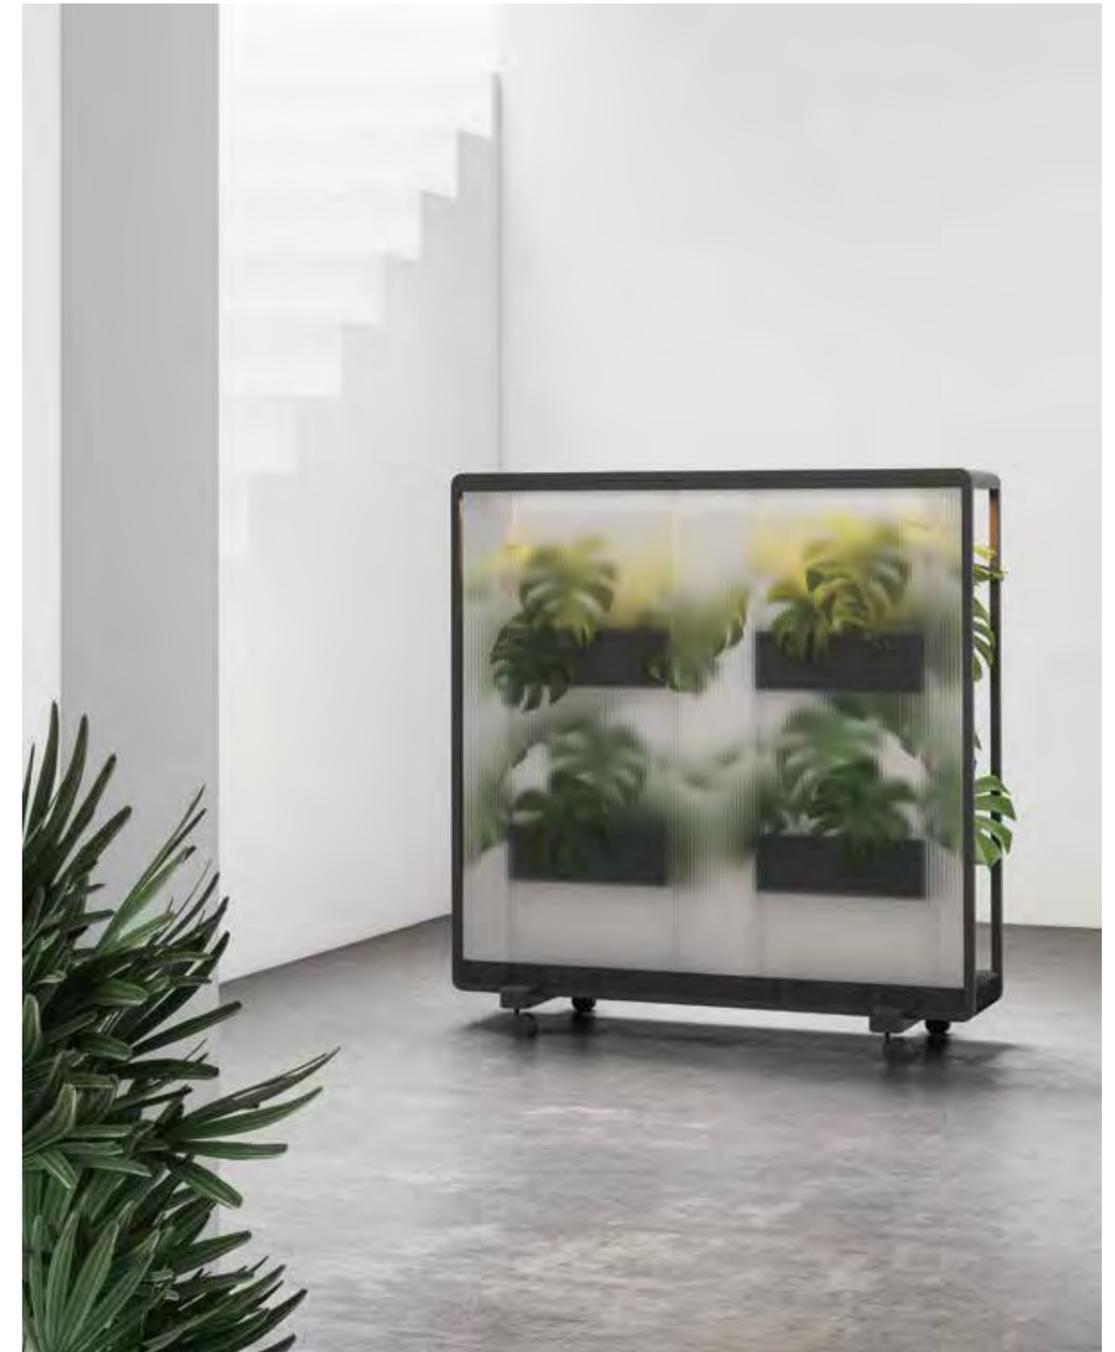

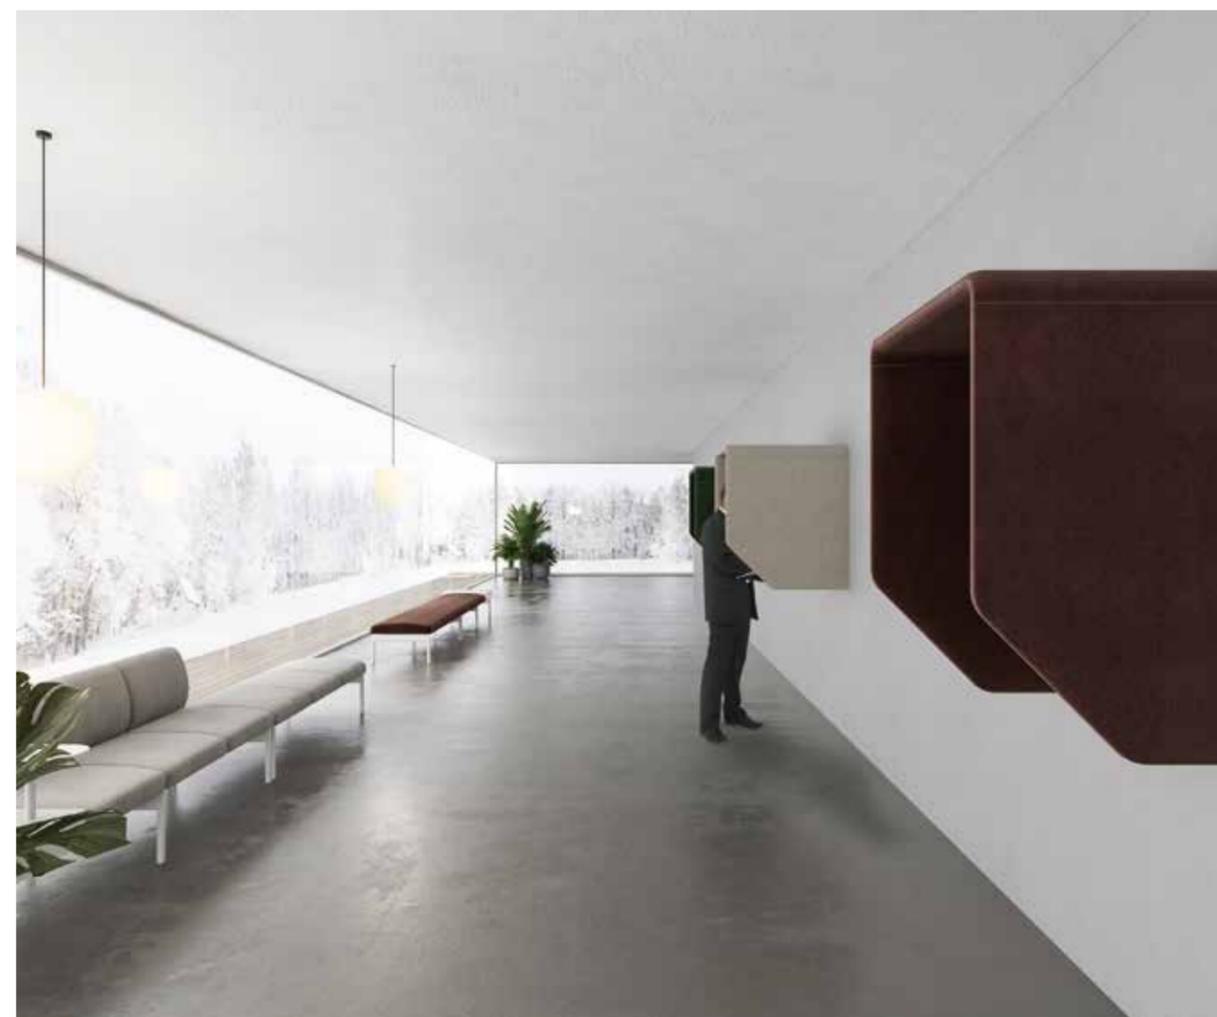

Hazy tries to bring the clarity, clarity and confusion between plants and light into the mood of the future office compartment. In addition to the green plants to bring workers a fresh and relaxed atmosphere around, convenient mobile and multi-functional design can more quickly create a more flexible and efficient working space.

Hazy

HAZY series is an office system of soft decoration partition products, written by the young Italian designer team STUDIO TZEN. It aims to use the clear, transparent and misty feeling between plants and light to create the artistic conception of the future office space partition. In addition to the green plants to bring workers a fresh and relaxed atmosphere around, convenient mobile and multi-functional design can more quickly create a more flexible and efficient working space.

Bequiet

We are beginners in the field of sound absorption, but we understand sound and know how much noise affects the space, and the physical and mental health of the worker. That is why we focus on how to isolate the sounds in the office space using the product itself, and how to reduce noise in the open office space to a reasonable level. We hope to bring peace and focus back to the office space.

Bequiet

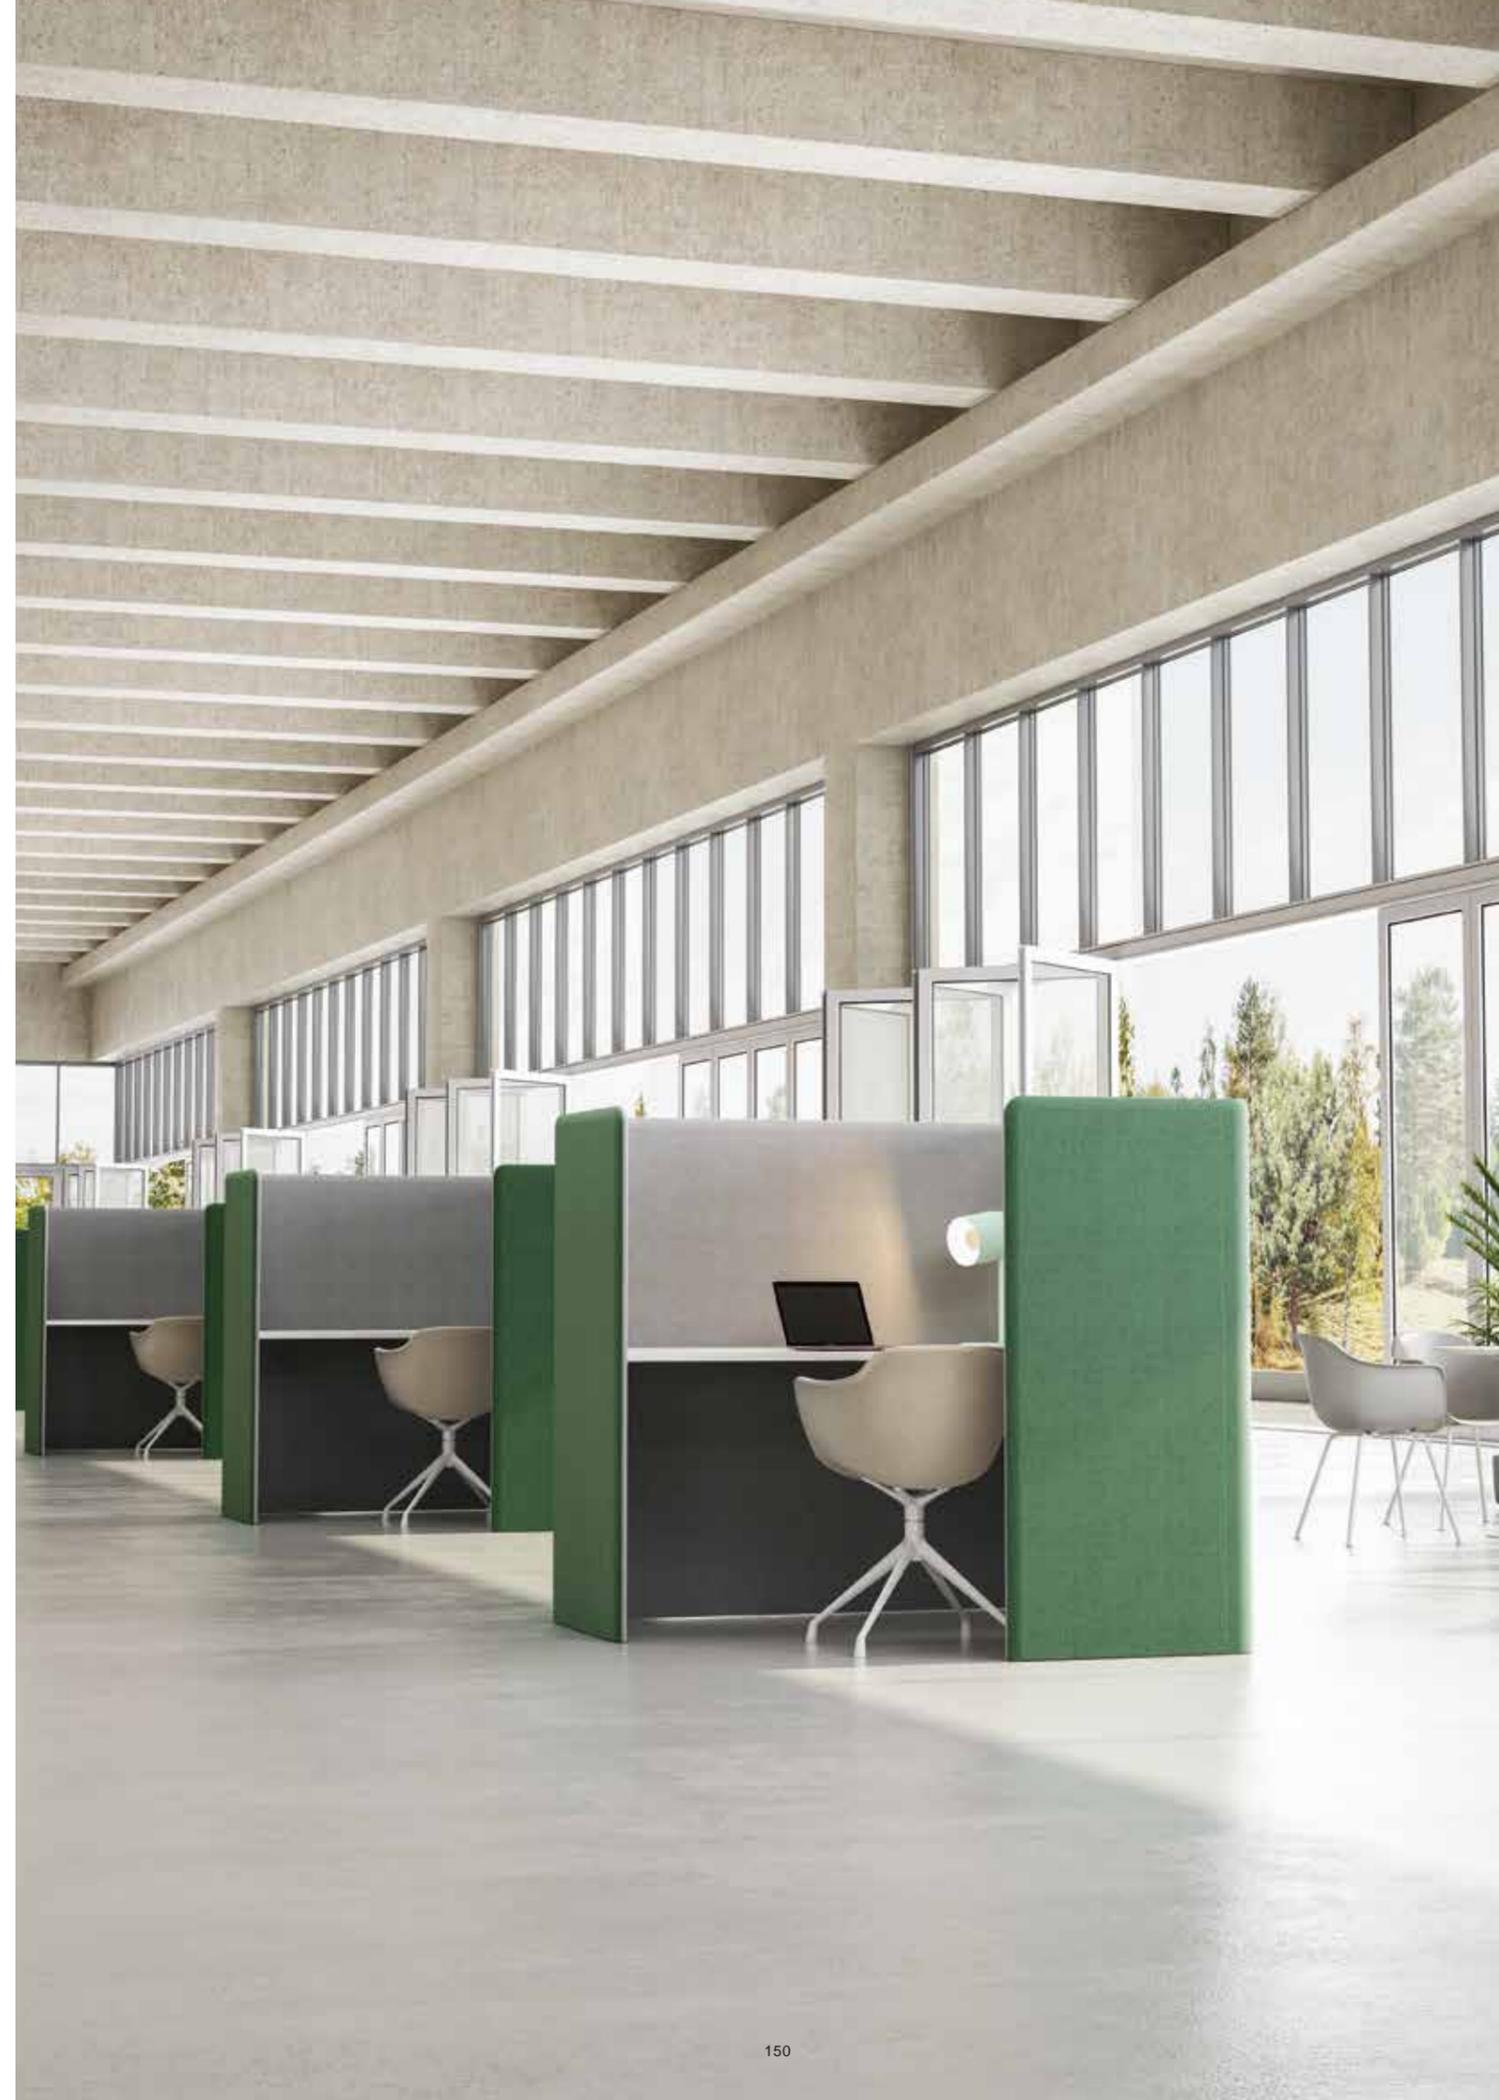

The soft surface, relaxing form, and cheerful colors deliver the message that the product is functional and quiet. Occasionally we need semi-private space in an open environment.

Bequiet

A lively discussion in an open and bright space is good, but we also need to consider the temporary need to focus. This product can block out the vision and absorb noise, with a lamp and convenient power supply that provide a semi-private environment to focus on the work.

Bequiet

Data suggest that a mobile office is more emotionally soothing and relaxing for workers, and in a high-paced office setting, a relatively quiet space is needed to unleash inspiration.

Bequiet

A quiet environment guarantees efficient work and creativity. Bequiet series offers a semi-enclosed space that not only takes care of privacy but also creates an atmosphere for casual negotiation.

Telefon

Telefon, in German, means the telephone booth. With the clarity of glass, they create temporary private spaces of your own in an open space. They are effectively insulated from outside noise and have complete ventilation and people-oriented lighting systems. LED lighting and indoor air circulation can be controlled by pushbutton according to the user's preference.

Allowing for aesthetically pleasing and noise-proof group meetings or discussions in an open environment.
